9 // Name: Kyle Klausen
10 // Date: 8/18/2024
11 // Assignment: Module 10 - JSON Form Program
12 // Current: Cleaned
13
14 // Purpose:
15 // This PHP program displays an HTML form that collects at least
16 // eight fields of user data. When the form is submitted, the PHP
17 // code validates the input, stores the data in an associative array,
18 // encodes the data into JSON format using json_encode(), and displays
19 // the JSON output in a formatted display.
20
21 // Inputs:
22 // First name, last name, email, phone number, address, city, state,
23 // zip code, program, and comments.
24
25 // Process:
26 // The program checks that required fields are not empty. If the form
27 // is complete, the data is encoded into JSON format.
28
29 // Output:
30 // A formatted JSON display or an error message if required fields
31 // are missing.
32
33 //
34
35 if ($_SERVER["REQUEST_METHOD"] == "POST") {
36
37     $firstName = trim($_POST["firstName"]);
38     $lastName = trim($_POST["lastName"]);
39     $email = trim($_POST["email"]);
40     $phone = trim($_POST["phone"]);
41     $address = trim($_POST["address"]);
42     $city = trim($_POST["city"]);
43     $state = trim($_POST["state"]);
44     $zip = trim($_POST["zip"]);
45     $program = trim($_POST["program"]);
46     $comments = trim($_POST["comments"]);
47
48     if (
49         empty($firstName) || empty($lastName) || empty($email) ||
50         empty($phone) || empty($address) || empty($city) ||
51         empty($state) || empty($zip) || empty($program)
52     ) {
53         echo "Error: One or more fields are missing. Please complete all required fields before submitting the form.</div>";
54         echo "<meta charset='UTF-8'>";
55         echo "<script>window.location.href='kyle_json.php?return=toForm';</script>";
56     } else {
57
58         $formData = array(
59             "firstName" => $firstName,
60             "lastName" => $lastName,
61             "email" => $email,
62             "phone" => $phone,
63             "address" => $address,
